Does 24X National Exchange LLC ("24X" or "Exchange") expect to enrich new tags raised by NSCC such as FIX tags 336 (Trading Session Identifier) and 715 (Business Clearing Date) on orders and/or executions?

In the 24×5 model, what actions or technical controls will be applied during the pause period from 8:00 PM to 9:00 PM ET? Can orders be queued in advance?

Is there any expected behavior change over the calendar time movement (23:59 to 00:00)? Will sequence numbers change or reset?

What is your pre-go-live plan and testing approach? When will non-production environments be available for overnight testing?

What actions will the Exchange take to mitigate risks at go-live?

Will members be able to configure and set up in advance of cutover?

What are the expectations for market data in evening sessions? Will direct feeds be available or will members rely on SIP?

Will the failover/backup scenario for the Exchange be in place during evening hours?

When there is an early close, how long will post-market run? Will there be differences once the Exchange goes live with 23×5?

Once SIP extends to 23×5 (expected December 06, 2026), should members expect Exchange go-live at the same time or shortly after?

Does the Exchange expect to have a separate dedicated port for the overnight session?

What changes are being made to trading hours?

What will the 24X National Exchange trading schedule look like going forward?

When will the new extended trading hours be implemented?

Who will be able to trade on 24X during the new extended trading session?

Will there be testing opportunities prior to implementation?

How will 24X National Exchange trading sessions change?

What trade date is assigned to trades executed during the Overnight Trading Session?

When are trades cleared and settled?

Do extended trading hours apply on holidays?

Are any additional steps required for firms to access the Overnight Trading Session?

Will trading support be available during the Overnight Trading Session?

Will 24X continue routing orders to other markets during the Overnight Trading Session?

What order validations are applied during the Overnight Trading Session?

Do Clearly Erroneous Execution rules apply during the Overnight Trading Session?

Can orders entered during the Overnight Trading Session remain live into the Core Session?

Will firms be able to apply different risk settings for the Overnight Trading Session?

How are risk breaches handled during overnight hours?

Will surveillance operate during the Overnight Trading Session?

Will trade confirmations and drop copy reflect the Overnight Trading Session?

Which order types will 24X accept for extended hours?

Do Limit Up Limit Down price bands apply during the Overnight Trading Session?

What trade conditions apply during the Overnight Trading Session?

Are extended hours trades included in consolidated volume?

Corporate Actions and Regulatory Halts

How are firms notified of corporate actions prior to the start of the Overnight Trading Session?

Trader Updates:

Rule 3.21. Customer Disclosures

Where can I find additional information on extended trading hours?
